

NP 4840-6-HD

Monoflo's high-pressure injection molded pallet systems are engineered to be more durable yet lighter, saving you money and lasting longer than competitive products. Our versatile line of pallets will perform brilliantly in any specific application.

The Monoflo NP 4840-6-HD is a heavy duty nestable pallet designed around the GMA 48" x 40" footprint. This pallet is a two-piece injection molded and welded pallet offering increased strength while minimizing weight. The NP 4840-6-HD has an industry leading 2,200 pound dynamic loading capacity* and is ideal for full case applications within the grocery, retail and food service industries.

It also features:

- > Standard footprint of 48" x 40" for GMA applications
- > Two-piece welded design offers strength and durability with a low tare weight
- > Unique molded-in, textured top deck provides reduced slippage
- > Four-way fork and hand truck entry for quick loading and unloading
- > Superior design in corner and foot areas increases durability
