

NP 4840/1210

Monoflo's high-pressure injection molded pallet systems are engineered to be more durable yet lighter, saving you money and lasting longer than competitive products. Our versatile line of pallets will perform brilliantly in any specific application.

Monoflo's NP 4840-6 and NP 1210-125 are designed around a 48" x 40" footprint for GMA applications and a 1200mm x 1000mm footprint for EU and international standards. Both products are one-piece, high-pressure injection molded with a smooth flow through design for hygienic applications. These pallets are designed for storage or shipment of distribution and retail goods, as well as high-end export needs.

It also features:

- > Two standard footprints: GMA 48" x 40" and EU 1200mm x 1000mm
- > Hygienic, one-piece, flow through design
- > Injection molded process gives the highest strength to weight ratio
- > Smooth, all-plastic molded product, with no nails or splintering
- > Four-way fork and hand truck entry for quick loading and unloading

NP 1210

One-piece design is strong and light weight
