# GET TO KNOW MONOFLO

***Packaging that outperforms. Partnership that over-delivers. Monoflo delivers injection-molded packaging solutions that help businesses thrive.***

At Monoflo International, we design, engineer and manufacture reusable injection-molded packaging like totes, containers, trays and pallets for some of the most recognized brands in the world. But what makes us an industry-leading supplier of reusable packaging isn't manufacturing excellence alone; it's our commitment to building trusted partnerships that position customers for success. With an excellence-obsessed mindset, a relentless focus on innovation and a people-centered approach to doing business, we deliver packaging solutions that empower industries to streamline supply chains, embrace sustainability and achieve their goals with confidence.

*We're redefining excellence in reusable packaging with cutting-edge manufacturing processes and innovative injection-molded solutions that maximize value in modern supply chains. Serving industries from automotive to eCommerce, we combine advanced engineering and technology with a personal commitment to customer relationships to ensure every solution delivers unmatched quality, reliability and performance.*

# Reusable Distribution Packaging Systems Designed to Deliver More

***Our attached-lid nestable totes and dollies are engineered for durability, efficiency and precise compatibility. Designed to optimize logistics and streamline handling, these reusable solutions move goods smarter, faster and more cost-effectively.***

For decades, Monoflo has set the standard in reusable injection-molded packaging for distribution, eCommerce and grocery applications. From our industry-first foldable designs to durable totes and pallets, we help businesses move smarter, faster and more efficiently. No one moves more product from source to store than Monoflo, and we continue to lead the way to better distribution logistics, reduced waste, safer handling and healthier bottom lines.

# Explore our Distribution Products

## ***Precision-Engineered Performance***

We leverage best-in-class design, manufacturing technology and industry expertise to deliver high-performance injection-molded plastic packaging that keeps goods moving more efficiently. All of our solutions are designed for safe and easy handling, optimal cube efficiency, and longer lifecycles to help businesses maximize value in modern distribution systems.

- Precise engineering for consistent performance and seamless integration in AS/RS systems
- Durable injection-molded construction for long-lasting reliability and performance
- Streamlined systems and cutting-edge products to optimize your efficiency
- Dedicated support and close collaboration to ensure your success at every stage
- Off-the-shelf and customized solutions that evolve with your needs

# Full Line of Distribution Solutions

**Available Footprints and Heights (inches)**

18x13x15	24x20x12
20x12x7	25x15x13
21x15x9	25x15x14
21x15x12	27x17x12
21x15x17	28x20x15
22x13x12	39x14x12

## Attached-Lid Totes

**Rugged Construction** | Reinforced corners, ribbed lids, and cross-strapping deliver superior impact resistance, stacking strength and long-lasting performance.

**Streamlined Plastic Hinges** | Innovative all-plastic hinges ensure safer handling and simplify recycling for end-of-life containers.

**Versatile Bottom Surface** | Bottoms are designed to prevent conveyor slippage with customizable options for closed, drain hole or open grid designs.

**Advanced Tracking Options** | Customizable options, like bar codes, license plates and RFID, ensure seamless integration with automated tracking systems.

**Available Footprints (inches)**

Nestable Pallets:

30x42
48x40
1200x1000mm

Rackable Pallets:

37x37
48x40

## Pallets

**Optimized Space Efficiency** | Designed with a 9-leg nesting system with cross-model compatibility to maximize storage and streamline return logistics.

**High-Performance Durability** | Engineered for demanding applications, our nestable pallets are constructed with a two-piece welded design for superior strength-to-weight performance and offer optional grommets.

**Slip-Resistant Design** | Includes textured top decks and optional deck lips to enhance load stability and prevent slippage during transport.

**Advanced Inventory Control Options** | We offer customizable options like embedded RFID tags, labels and license plates for seamless identification & tracking.

**Available Footprints and Heights (inches)**

24x44.5x25	48x44.5x27
32x30x25	48x44.5x33
32x30x34	48x44.5x34
48x40x34	48x44.5x42
48x40x39	48x44.5x50
48x44.5x25	

## Bulk Containers

**Durable Build** | Reinforced corners, U-channel ribbing, and a market-leading heat-welded base provide enhanced strength-to-weight performance and durability.

**Flex-Hinge Design** | All-plastic construction with no fiberglass or metal makes assembly, disassembly and field repairs safe and easy.

**Easy-Handling Features** | Optional access doors, 4-way forklift and pallet jack channels and bottom runners for conveyor systems streamlines handling and transport.

**Advanced Tracking Options** | Customizable options, like bar codes, license plates and RFID, ensure seamless integration with automated tracking systems.

## Automation Containers for Distribution

**Precision-Engineered Design** | Built for easy system integration with automated storage and retrieval systems (AS/RS).

**Durable Construction** | Injection-molded plastic ensures lasting performance and superior deflection strength.

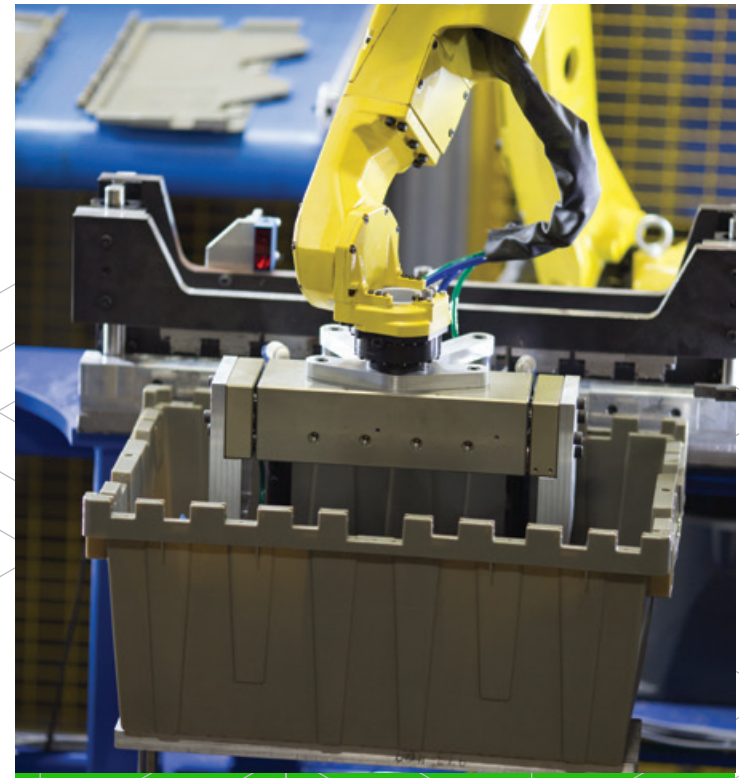

**Optimized Handling** | Pin-hole base options and lifter plates enhance efficiency in pin-based lift-and-sweep systems.

**Advanced Tracking Options** | Versatile labeling options enable ID tags, in-mold labeling, license plates and RFID for accurate, real-time tracking.

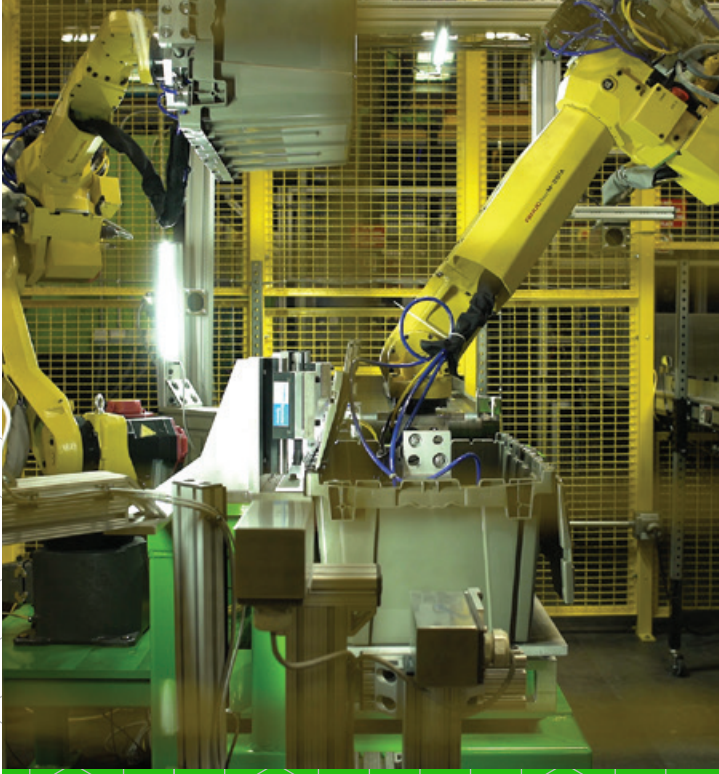

# Why Choose Monoflo Distribution Products?

Distributors, retailers, and grocers face mounting challenges, from labor shortages and rising costs to the demand for faster, more efficient operations. Our attached-lid nestable totes and dollies are purpose-built to reduce costs and headaches in complex warehouse environments, fast-paced supply chains and busy retail spaces. With our durable, reusable solutions, you can optimize storage, streamline logistics and improve handling to keep your business moving forward.

- Optimize logistics with durable, reusable totes and dollies engineered with deep industry knowledge that allows them to meet your daily challenges.
- Enhance speed and handling with injection-molded totes and dollies that are designed for ergonomic handling and 100% compatibility with industry-standard automation systems.
- Save cost and space with attached-lid totes and dollies that reduce storage and transport footprints, cut waste, and improve overall cost effectiveness in high-demand environments.
- Improve handling safety and recyclability with all-plastic totes that eliminate hazardous metal hinges.

## More reasons Monoflo's offerings make sense for distribution customers...

**Consistent Quality, Fast Turnaround** | On the service side, our culture drives prompt response to customer inquiries. In production, our fully automated manufacturing cells allow us to rapidly develop highly consistent tote and dolly solutions. Overall, our approach enables us to turn orders around quickly while delivering superior quality.

**Built to Last** | Crafted with high-pressure injection-molded plastic, our reliable, cost-effective attached-lid totes and dollies deliver unmatched strength, long-lasting performance and protection you can count on.

**Efficiency Redefined** | Our team has the industry expertise and partnership mindset to design tailored solutions that streamline your operations, reduce manual effort and maximize productivity in fast-paced supply chains.

**Sustainable Buyback Program** | We buy back our 100% recyclable attached-lid totes and dollies at the end of their useful life and regrind them in our state-of-the-art reprocessing facilities, helping to close the loop in your supply chain.

### Customization Is Always An Option

We make custom containers and pallets all the time. If you don't see exactly what you need in our existing product line, we will gladly engineer, design and manufacture precisely what you need for your unique system.
