

Additional Features:

- Designed for durability and larger load handling with injection-molded construction.
- Drop-in compatible with the prevalent 28 x 20 x 15 attached-lid tote format used in today’s DC operations.
- All-plastic hinge eliminates metal pins to improve safety and recyclability; reinforced bumper system extends lid life.
- A refined structure lightens each lift and lowers carbon impact, all while maintaining the durability required in demanding environments.
- Lid detents help keep the lid open during use in automated systems.
- Multiple configuration options: optional drain hole bottom, recycled content, and any color.
- Tracking and identification features available, including barcodes, license plates, RFID, label areas, and custom hot stamps.
