

Pallets

We engineer our pallets to deliver unmatched durability, efficiency and performance in modern supply chains. Our selection of pallets ranges from nestable designs that optimize storage and return logistics to rackable and stackable options built for heavy loads. Manufactured with high-pressure injection-molded plastic, these pallets offer superior strength-to-weight ratios and durability in even harsh applications. Customizable features, including RFID tags, ergonomic handles, and textured surfaces, ensure our pallets deliver reliable, reusable solutions tailored for your unique supply chain demands.

Model	Entry	Material	Outside Dimensions (inches)			Weight (lbs)	Static Load (lbs)	Dynamic Load (lbs)	Edge Rack Load (lbs)	Stack Qty	Trailer Qty 53'
